# Bar Code Analyzer

The **SCAN ANALYZER** by **SSE Technologies** enables scanning any bar code, and see the the features of the barcode, including symbology type, length and content. Of particular interest is the ability to display "hidden characters" in the code. This is very useful in QC applications. The Analyzer is a completely portable device that allowing the user to scan bar codes at the point of activity. All analyzed bar code information is stored in the device and can be saved as an Excel as a .csv file.

Screen
